

Telia Connected Vehicle

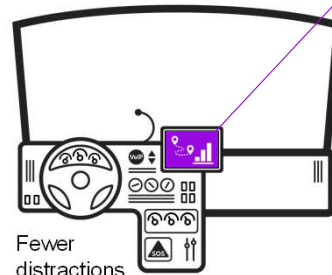

## YOUR FLEET AT YOUR FINGERTIPS

Consolidate your onboard IT systems to make driving easier. And give yourself the real-time tools to manage your fleet more efficiently, profitably and sustainably.

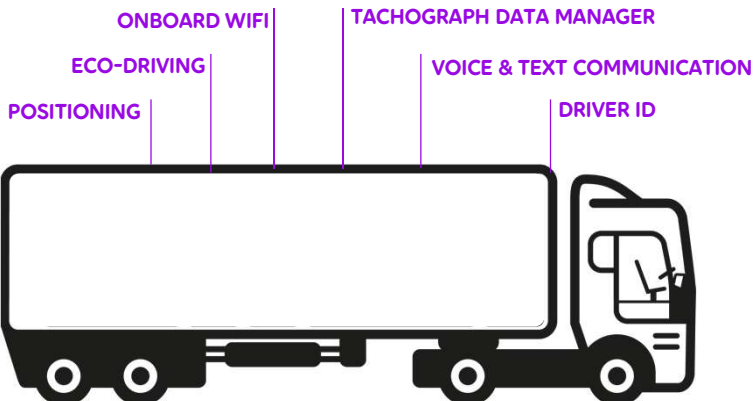

### ONE PLATFORM. ONE SCREEN.

Telia Connected Vehicle is an onboard, open IoT platform. It enables you to maximise fuel efficiency and vehicle life span while minimizing Co2 emissions and operational down time. But that's just the start.

Telia Connected Vehicle is brand-neutral and works in any vehicle. And because it's an open API based platform, you can integrate your own and third party applications. This lets you analyse exactly what's happening in your fleet and make the most of your assets.

Fewer distractions mean safer driving

### KEY BENEFITS

- Consolidate onboard IT systems
- Reduce complexity for the driver
- Optimise fuel consumption
- Reduce Co2 emissions
- Increase driving safety
- Automate tachograph data transfer
- Real-time fleet positioning

Eco-driving helps drivers reduce fuel consumption by up to 15%  
That's good for business and great for the environment.

## CONNECTED VEHICLE APPLICATIONS

### POSITIONING

A clear overview of your fleet's real-time positioning: where they are, their direction and their status. As well as the positioning history. Making it easier to distribute resources and achieve optimal usage out of all the vehicles.

### ECO-DRIVING

Help your drivers to improve their driving style as well as lower their fuel costs and Co2 emissions. You can save up to 15% of your fuel consumption per year and vehicle.

### MESSAGE PUSH

Help the driver and the traffic management stay connected. Traffic management can easily send messages to drivers from anywhere and drivers can respond by sending status codes.

### TACHOGRAPH DATA MANAGEMENT

Automatic collection and storage of tachograph data. Fulfill your regulatory obligations and help drivers manage their driving fatigue.

### DRIVER ID

Driver identification that link the driver to the vehicle. Adds another layer to positioning information, as you can immediately see who's in a certain vehicle and get an easy overview of the fleet.

### INTERNET ON BOARD

Add stable and fast WiFi onboard the vehicle. And because your on Telia's digital infrastructure, you know you have the best coverage across the Nordics and Baltics.

### ADD YOUR OWN POSSIBILITIES

With an open platform and APIs, you can add your own services or combine 3<sup>rd</sup> party applications.
